Ptc Evolution Script Nulled Theme BETTER

So, we can understand that the malware itself does not come in plugin form. Its a standalone PHP file which when downloaded will delete all files on your website. This places all files to a common place and lets the malware to do its work. It will find the files of all plugins and theme folders from where it can modify the files. There are three main files on a WordPress website which is responsible for the homepage look and also for the post and page look on your site. Its the files index.php, header.php and footer.php. This is so popular that you have to look in Google for ways to stop it from interfering on your WordPress website. We first came across this malicious script early this year when we spotted a few posts on some sites discussing this topic. Shortly after our blogpost, we see many more sites posting such information so its very popular. We initially thought this must have been a new threat and we were not surprised when the same malware appeared on some other popular sites. The malware uses the file_get_contents() function to find all files from the specified folder and then delete all files in this folder or rename them.
